

Shear Comfort[®]

Foot Care

Providing protection,
security and comfort for the
feet and ankles.

**Shear Comfort[®] Foot Care
could save your life.**

Prevent now before its too late!

The Benefits of Shear Comfort®

- **Total Skin Ulcer Prevention:** Calling it a pressure ulcer doesn't tell the whole story. Pressure is not the only factor, and many argue it's not even the major factor, in skin ulcer development. Shear Comfort® provides effective pressure redistribution, shear and friction reduction, as well as dissipating heat and water vapour. That makes it an ideal product for tackling all external contributory factors to skin ulcer development .
- **Infection Control:** All Shear Comfort® products can be washed repeatedly at 80°C, which is proven to kill bacteria, giving you confidence in using Shear Comfort® time and time again.
- **Comfort:** The properties of lambs wool that make Shear Comfort® Foot Care ideal for preventing skin ulcers and damage, also ensures superior comfort. Shear Comfort® products redistribute pressure, wick perspiration away from the skin, and transfer heat, ensuring comfort whether on the move, in a chair, or in bed.
- **Adaptable Protection:** We believe footwear should be made to fit the foot, not that the foot should be forced to fit the footwear. That is why our Foot Care range is designed to be adaptable throughout the day to accommodate any swelling or discomfort.
- **365 Days of Comfort:** By effectively transferring heat, Shear Comfort® Foot Care products allow for effective temperature regulation, providing welcome relief for people suffering from arthritis or poor circulation, whilst also keeping you cool and comfortable in the summer.

A Helping Hand

Shear Comfort® Foot Care products are designed to provide comfort, protection, security, and freedom to those at risk from damage to the skin of the feet and ankles.

The Range

Wrap Around Boot™

p2

Rubber soled, full foot protection that is easy to put on, adjust, and take off

Pressure Care Boot™

p4

Rubber soled with open toe design allowing easy toe separation and circulation inspection

Short Slipper Boot™

p6

Full foot protection with suede sole for indoor and in bed use

Tall Slipper Boot™

p8

Full foot and lower limb protection, for use indoors and in bed

Heel Protector

p9

Unencumbered support and protection for the at risk heel and ankle area

Sovereign Snug™

p11

Comfort and protection in a low profile moccasin design

Wrap Around Boot™

The Wrap Around Boot™ offers full foot protection for use in and outdoors

Hook and Loop straps for easy closure and adjustment

Closed Toe Design for full foot protection

Rubber Sole allowing use outdoors

Comfort and an accommodating fit are ensured by the generous Hook and Loop strapping on the heel and top of the foot, allowing simple adjustment throughout the day to accommodate any discomfort or swelling.

Incorporating a low profile rubber sole ensures the boot can be worn outside as well as in, offering freedom of movement to the wearer. The rubber sole does not affect the washing procedure for the shoe.

The natural properties of sheepskin ensures that comfort and protection is provided to the foot by it being fully enclosed. The water vapour dissipation qualities of the wool ensure any perspiration is effectively wicked away from the skin.

Pressure Care Boot™

The Pressure Care Boot™ features a rubber sole for use outside as well as in, plus an open toe for easy toe inspection, toe separation, and air circulation.

Hook and Loop straps for easy closure and adjustment

Open Toe Design for easy toe inspection and separation

Rubber Sole allowing use outdoors

The Hook and Loop straps around the heel and across the bridge of the foot allow the shoe to be opened fully and adjusted to ensure that the shoe moulds comfortably to the shape of the foot. The Pressure Care Boot™ can be adjusted as required to accommodate any discomfort or swelling throughout the day.

The low profile rubber sole ensures the freedom to experience the comfort and protection of the Pressure Care Boot™ both outside and in. The rubber sole does not limit the washability of the shoe.

Short Slipper Boot™

The Short Slipper Boot™ is designed to provide full foot protection, and is ideal for use both indoors and in bed

Hook and Loop straps
for easy closure and
adjustment

Suede Sole
for use
indoors or in
bed

Closed Toe Design
for full foot protection

The Hook and Loop strapping and tongue flap down the length of the upper part of the boot ensures it is easy to put on and adjust throughout the day or night, providing adaptive protection and comfort. The Short Slipper Boot™ has a heightened ability to mould to the foot, and can be comfortably worn in bed. The boot design ensures that the bony prominences of the ankle are fully protected as well as the foot plantar surfaces and heel, ensuring comfort and protection when worn in bed, or with your feet up.

The natural properties of the sheepskin help to keep feet warm in winter, benefiting those of any age with poor circulation, while still keeping you cool in summer, for year-round comfort.

Tall Slipper Boots™

The Tall Slipper Boot™ is designed to provide protection and support to the entire lower limb in as unencumbered a design as possible

The Tall Slipper Boot™ is ideal for providing the necessary security to those at risk from skin ulcers to the feet and legs, or those with vascular problems.

Generous Hook and Loop fastenings along the entire boot ensures it can comfortably accommodate most legs or feet, regardless of swelling, and can be readily adjusted as required. This also ensures that the boot can be used in conjunction with compression bandages or support hosiery. The open toe design ensures toe separation and circulation inspection can be done without removing the boot.

The Tall Slipper Boot™ has no sole, making it ideal for use indoors, or in beds and inclined chairs.

Heel Protectors

Providing security and comfort to the heel and ankle areas

Shear Comfort® Heel Protectors provide unencumbered security and protection for the at risk heel and ankle areas. The thick wool redistributes pressure and reduces shear while the heat and water vapour dissipation qualities provide added skin protection and ensure comfort in use.

Effective Pressure Redistribution

Just one of the many benefits of Natural Sheepskin

Normal Shoe Surface

These two pressure mapping images demonstrate the effectiveness of Shear Comfort® Foot Care products in redistributing pressure; one of the contributing factors in skin break down and skin ulcer development.

Shear Comfort Pressure Care Boot™

On this subject*, the use of a Shear Comfort® Pressure Care Boot™ has effectively reduced the peak pressure points on the heel and ball of the foot by redistributing the pressure. This ensures comfort and protection for the user.

*90kg individual wearing stockings

Sovereign Snugs

The Sovereign Snug is a low profile moccasin style slipper designed to provide exceptional comfort in a pleasing design

The small, refined style of the Sovereign Snug makes it ideal for if you want to experience the added comfort of Shear Comfort® Foot Care wherever you may go, whether in the home, or on your travels.

What goes into Shear Comfort®

Shear Comfort builds on the natural properties of Lambs Wool to make it ideal for care and in-home applications.

Lambs Wool

Pressure Redistribution
Reduces Shear
Reduces Friction
Dissipates Vapour
Dissipates Heat
Provides Comfort

Shear Comfort adds...

Repeat washes at up to 80°C (HITEMP)
Urea Resistant (UR)

Shear Comfort® Australian Medical Sheepskin combines the natural benefits of lambs wool with HITEMP UR properties, making it THE sheepskin for medical applications as it allows for infection control, and won't deteriorate with exposure to urea.

Maintaining Shear Comfort®

Shear Comfort® Sheepskin Shampoo & Conditioner

To maintain the advantages of Shear Comfort® sheepskin products, use our Shampoo & Conditioner products which contain Tea Tree Oil to kill dust mites and mould, and prevent odours.

Shear Comfort® Foot Care products could save your life! One effect of diabetes is a deterioration of the nerves, meaning tissue damage often occurs without the patient realising. Another effect of diabetes is less effective tissue repair. The result is that a small blister on the foot can quickly escalate, resulting in limb amputation, after which life expectancy is dramatically reduced. Don't let it get to that stage....

....Prevent NOW, or cure may not be an option !
