

CONTROL YOUR WORLD AT THE TOUCH OF A SCREEN

The REM400 remote

LINX[®]

**SEVERAL YEARS IN THE MAKING,
WELCOME TO THE EVOLUTION
IN REVOLUTION...**

INTRODUCING THE LiNX REM400 BY INVACARE

Building on the success of our first wave of Smart Technology, we have fused extensive trials and consumer-led insights to bring next generation technology to your powerchair. Thanks to its innovative remote and impressive 3.5" colour touch screen, the LiNX REM400 truly redefines mobility. Was there ever a remote and screen so smart? Nope. Not until now, anyway...

WANT A TOUCH SCREEN THAT PUTS YOU IN COMPLETE CONTROL?

So much more than just a touch screen, the REM400 allows you to adjust the brightness of the screen, whilst giving you access to your profiles and functions via touch, button or joystick. Its unique 'glove mode' setting allows you to operate with gloves on, while the touch screen lock out function reduces the risk of accidental profile / function changes.

WANT THE POWER TO PERSONALISE?

With a range of innovative personalisation options, the REM400 control works alongside and adapts to both your physical and cognitive abilities. Indeed, the control boasts swipe or tap operation settings, depending on whether you have gross or fine motor control abilities. A choice of direct access or menu navigation allow for optimum user navigation, with left or right-handed functionality ensuring clear access to operate powerchair, your way.

WANT TO CONNECT TO YOUR WORLD WIRELESSLY?

With built-in Bluetooth as standard, the REM400 and REM500 controls allow you to connect to your phone, computer, tablet or any other Bluetooth device. You can connect to a total of three devices simultaneously and, with mouse mover functionality, staying in control has never been so easy.

WANT A JOYSTICK THAT MOVES WITH YOU?

Built with the user in mind, the REM400 joystick knob has been specifically designed to make it easier to access the screen with its orientation adaptable to suit a range of motions. The on/off switch on the remote is positioned out of the way to prevent accidental turn off, with two programmable, multifunctional, direct access buttons and two pre-configured stereo jack inputs to increase ease of use.
